Whites are only 16% of the world's population, yet they are the most industrious and innovative race the world has ever known.

Whites unlocked the secrets of DNA and relativity, launched satellites, created automation, discovered electricity and nuclear energy, invented automobiles, aircraft, submarines, radio, television, computers, medicine, telephones, light bulbs, photography, and countless other technological miracles.

Whites were the first to circumnavigate the planet by ship, orbit it by spacecraft, walk on the moon, probe beyond the solar system, climb the highest peaks, reach both poles, exceed the sound barrier, descend to the oceans depths. Conversely, negroes cannot even feed themselves.

Whites have to provide food, medical, financial, and engineering aid to every Black nation. Blacks cannot survive without White charity.

No pre-contact Black society ever created a written language, or weaved cloth, or forged steel, or invented the wheel, or plow, or devised a calendar, or code of laws, or system of measurement, or math, or built a multi-story structure, or sewer, or drilled a well, or irrigated, or created any agriculture, or built a road, or sea-worthy vessel. They never domesticated animals, or exploited underground natural resources, or produced anything that could be considered a mechanical device.

Blacks were still living in the Stone Age when Whites discovered them just 400 years ago.

Blacks are the oldest race, so they should be the most advanced - but they never advanced at all. Blacks lived alone in Africa, a vast continent with temperate climates and abundant resources for 60,000 years so they cannot blame slavery, racism, colonialism, culture, environment, or anything else for their failures.

Put simply, life is an IQ test.
